

## Product Overview:

---

The **Coloured Detector Cover Kit** allows detector colour to be changed to match décor.

It is available in black **BCK-200B** and white **WCK-200B**.

The detector cover may be used with the base cover or with a coloured detector base.

Fits the following analogue addressable detectors:

- 1251BPI (Ionization)
- 2251BPI (Photoelectric)
- 5251BPI (Fixed Heat)
- 5251RBPI (Rate of Rise Heat)

Fits the following conventional detectors:

- 2151BPI (Photoelectric)
- 5151 Series (Fixed Heat)

The detector cover does **NOT** fit:

- 2251CTLE-34-IV (Photo, Thermal, CO & IR)
- 22051TLE-34-IV (Photo Thermal & IR)
- 2251TMBPI (Acclimate, Photo & Thermal)
- 7251 (Laser Based Photoelectric)

**Black Detector Cover Kit  
(BCK-200B)**

## Installation:

---

- » The detector cover kit contains two parts: the detector cover and the base cover
- » To fit the detector cover, first remove the original cover, then clip the new cover in its place
- » Slip the base cover over the detector base or, if using the coloured detector base discard the base cover
